## Description :

Prsentation de l'diteurHomework assignments that learn from students. Courses tailored to fit individual pupils. Textbooks that talk back. This is tomorrows education landscape, thanks to the power of big data. These advances go beyond online courses. As the New York Times-bestselling authors ofBig Dataexplain, the truly fascinating changes are actually occurring in how we measure students progress and how we can use that data to improve education for everyone, in real time, both on- and offline. Learning with Big Data offers an eye-opening, insight-packed tour through these new trends, for educators, administrators, and

readers interested in the latest developments in business and technology.
