## Description :

Prsentation de l'diteurHis fully illustrated book, also known as Darwin's Journal of Researches, is a vivid travel memoir as well as a detailed scientific field journal covering biology, geology, and anthropology that demonstrates Darwin's keen powers of observation. A fascinating glimpse into the world (parts of it anyway) as seen through the eyes of Darwin. For those not so much interested in the biology parts, there are plenty of accounts of the tribes and the people he came across.Prsentation de l'diteurHis fully illustrated book, also
